

DE GARUDA
JEWELRY

ABOUT US

We are a diamond jewelry startup located in Miami. We source quality diamonds and needed raw materials directly, design, and create each piece with love and care for our #GarudaFam.

DeGaruda Jewelry is a quintessential, one of a kind jewelry company that creates enticing designs infused with excellent craftsmanship. The company got its start in the hustle bustle of the streets of India, to provide high quality gold for jewelers and customers alike.

By the 1990's, the company had grown to become a major name in the jewelry market under the name of Mitalal, we have since launched its fine Jewelry division. From cutting stones to manufacturing fine jewelry pieces and everything in between, DeGaruda under the Bohra family specializes in creating exotic, one of a kind designs that are adored by all who wear them.

As one of the very few companies in the industry that are completely vertically integrated with an emphasis in supply chain, The Bohra family has used its experience and in-depth knowledge to set up one of the most creative and efficient design houses; from cutting exotic precious stones in unique shapes to creatively designing one of a kind jewelry pieces, which are then worked upon by master craftsman in our state of the art in-house facility; thereby ensuring the highest quality every step of the way. We aim to grow and facilitate growth in this ever changing industry.

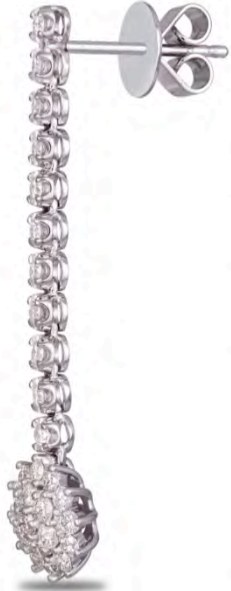

Our young team constantly travels the world seeking inspiration and studies trends across different regions, which attributes to our success on a global platform. Our goal is to continue to strive and exceed the expectations of our clients. We are dedicated towards building a strong future for our brand by creating fine jewelry that fascinates and is admired.

OUR PHILOSOPHY

PREVIOUS EXHIBITION

EXHIBITION PIECES

Fore-note –

Each picture here represents a line and a style. On the first page we have what we call a pie cut which is our take on invisible cut on steroids. There are no prongs, in-between the center diamonds and they hold each other by supporting one another. The bottom of the first page, we have an extension of our baguette work.

Next we encounter our same baguette work but re imagined in color. Towards the end we have a page solely dedicated to earrings. Here we showcase our higher end lines, from climbers to green and blue dipped gold. The blue and green dipped gold both have rose cuts diamonds. We have a huge collection of enamel work, they are represented by the 2 pieces you find there. The enamel work, comes in 6 different colors which further come in 3 different golds.

Next we showcase our higher end rings. We've refocused our efforts on precious stones and on sand finish here. On the last page, we see a spring diamond bracelet which is a huge line for us. After getting great responses last year, we've decided to come up with our own spring line. From bracelets to rings, everything is spring !!
